PROFESSIONAL SUMMARY

Senior Backend Developer with **6+ years** of experience architecting scalable, high-traffic systems using Laravel, PHP 8.x, and microservices on AWS and Docker. Deep expertise in system design, performance optimization, and search and caching layers (Elasticsearch, Redis), with end-to-end ownership from design to production. Proven mentor and technical lead who drives legacy modernization, raises code quality, and delivers measurable business impact.

TECHNICAL SKILLS

Backend: PHP 8.x, Laravel 8-13, Eloquent ORM, Laravel Queues
Frontend: HTML, CSS, Bootstrap, jQuery, Angular (Basic)
Databases & Search: MySQL, Redis (Caching, Queues, Sessions), Elasticsearch
Architecture & Design: System Design, Microservices, RESTful APIs, Event-Driven Architecture, OOP, Design Patterns (SOLID)
DevOps & Cloud: AWS (EC2, S3, RDS, SQS), Docker, Docker Compose, CI/CD (GitHub Actions), Nginx
Tools: Git, Bitbucket, GraphQL, Jira, ChatGPT, Antigravity, Gemini, Meta AI, etc
Others: AJAX, Payment Gateway Integration, Third Party APIs Integration

WORK EXPERIENCE

Senior Backend Developer | Molitics Infomedia (Social Media & News Platform) *Nov 2024 – Present | Delhi, India*

- Contributed to an existing microservices backend (Laravel, Lumen, Node.js, Python), developing and maintaining services across repositories to support feature releases and system improvements.
- Led refactoring of legacy monolithic modules into clean, SOLID-based service layers, cutting average API response time by **30%** and reducing dev time.
- Optimized high-traffic MySQL queries and response handling through indexing, query restructuring, and Redis caching, reducing DB load.
- Designed lean, well-documented REST APIs in collaboration with frontend teams, shortening integration cycles and accelerating feature delivery.
- Drove engineering standards (code reviews, structure conventions, CI/CD with GitHub Actions) that improved release reliability.

Full Stack Developer | Softintra Technology *Mar 2021 – Sep 2024 | Uttar Pradesh, India*

- Led migration of **10+** client applications from core PHP to CodeIgniter and Laravel, improving maintainability, security, and delivery speed, and strengthening client trust and retention.
- Designed modular, reusable architecture with Eloquent ORM, queues, and third-party and payment gateway integrations, reducing repeated development effort.
- Mentored **5** junior developers through onboarding, code reviews, and best practices, enabling first project deliveries of joining.
- Delivered end-to-end features across backend and frontend with full ownership, consistently meeting client deadlines across **7+** projects.

PHP Developer | Bharat Taxi *Mar 2020 – Feb 2021 | Uttar Pradesh, India*

- Built core PHP modules that supported on-time delivery of production releases while working closely with senior engineers.
- Improved frontend UI and user flows, increasing user engagement and contributing to website design.

KEY ACHIEVEMENTS

- Reduced development time by **30%** through backend restructuring and standardized code patterns at Molitics Infomedia.
- Improved API response times by **30%** by combining query optimization, Redis caching, and legacy refactoring.
- Led a core-PHP-to-Laravel migration across **10+** projects, raising code quality and client confidence.
- Grew from PHP Developer to Senior Backend Developer in **6 years**, adding mentoring and architecture ownership at each step.

EDUCATION

Bachelor of Computer Applications (BCA) | Swami Vivekanand Subharti University *2017 – 2020*
